Dairy Farm

Color in the picture below!

Did you know?

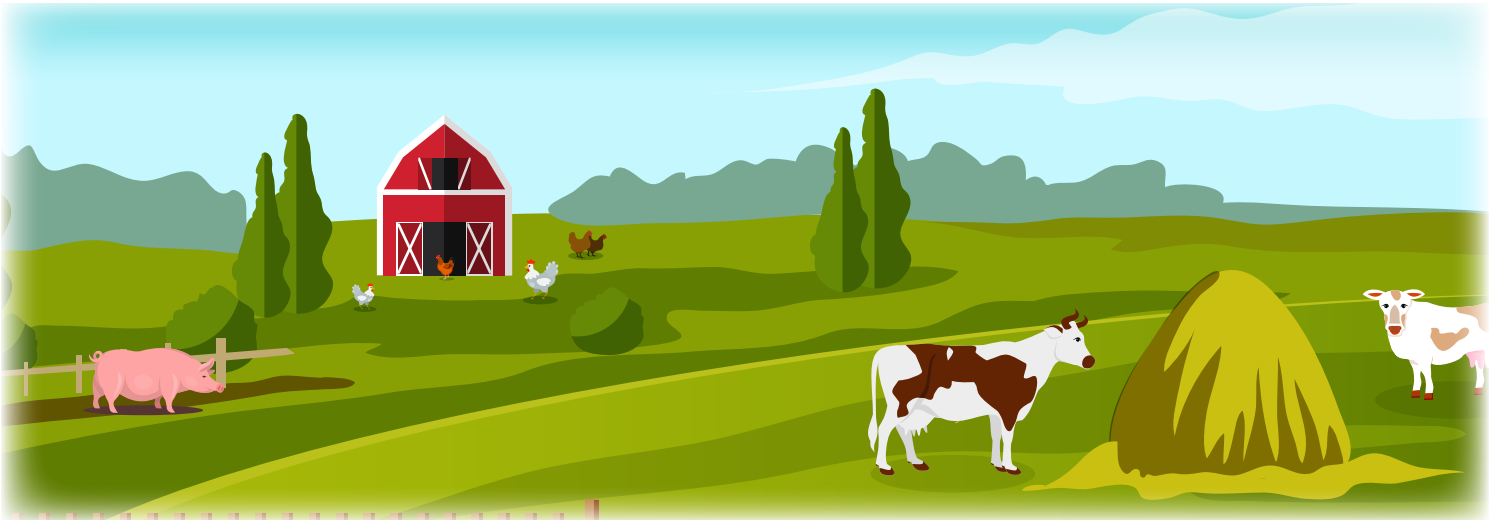

- Milk arrives at your local grocery store within **48 hours** of leaving the farm.
- Like fingerprints, no two cows have **exactly** the same pattern of spots.
- Milk contains **eight times** more protein than almond and rice milk.

Farms come in all shapes, sizes and types.

Crop Farms - These farms grow fruits, vegetables, or grains. The farm above is growing soybeans, wheat, and corn. **Add yourself as the farmer!**

Livestock Farms - These farms raise animals for meat, eggs and dairy. Some farms may be exclusive to a certain type, such as meat, poultry or dairy or they can be a variety. Also, some farms may also have livestock and crops.

Other Farms - These farms can be energy-related forms like wind or solar farms, orchard farms, bee farms, greenhouse farms to grow plants all year round or grow plants in their non-native climate. These farms can be exclusive to a certain type or a variety.

What's your favorite kind of farm?

DID YOU KNOW?

- Corn is called maize by most countries, this comes from the Spanish word 'maiz' "Maize" is an indigenous Taino word meaning "sacred mother," or "giver of life."
- One acre of soybeans can produce 82,368 crayons.
- One acre is about the size of a football field.
- Corn is a cereal crop that is part of the grass family.
- An ear or cob of corn is actually part of the flower and an individual kernel is a seed.
- On average an ear of corn has 640 kernels in 16 rows.
- Corn will always have an even number of rows on each cob.
- A bushel is a unit of measure for volumes of dry commodities such as shelled corn kernels. 1 Bushel of corn is equal to 8 gallons.
- With the exception of Antarctica, corn is produced on every continent in the world.
- There are over 3,500 different uses for corn products.
- Soy ink is used to print newspapers and textbooks.
- Soybean is used in plastics, wood adhesives and textiles. An entire building can be made by just using soybean products.
- The soybean is the highest natural source of dietary fiber.
- Farmers across the U.S. grow soybeans that have been harvested into yields of about 4 billion bushels a year.
